

MFNiQ

COMPILE | COMPARE | CREATE

MFNiQ is an innovative legal tech tool we have developed in collaboration with a leading tech firm. It showcases our ongoing drive to find innovative solutions to deliver outstanding client service alongside our experienced practitioners in one of the deepest and most globally integrated investment funds practices in the world.

The tool automates the generation of composite side letters on fundraises. It extracts and groups similar provisions and merges duplicate clauses – bringing this process firmly into the digital age. The platform also increases efficiency during investor negotiations, by providing an instant overview and comparison of all side letter terms at every stage of a fundraise, reducing potential for inconsistencies.

Composite side letters

- 🔍 Support fund managers with their ongoing compliance obligations by having all agreed terms in one document, illustrating which investors have received the benefit of each provision.
- 🔍 Facilitate the process for “most favoured nation” elections on final closing by enabling disclosure of all relevant provisions to investors in a single text.
